***Election/Restrictions***

1. This application contains claims directed to the following patentably distinct species:

Species I: Figures 1-3

Species II: Figure 4

Species III: Figure 5A

Species IV: Figure 5B

Species V: Figure 5C

Species VI: Figure 5D

Species VII: Figure 5E

2. The species are independent or distinct because in Species I the protuberance increase in height from the inside of the selector pedal to the outside thereof. In Species II does not contain protuberances only steps with inclined surfaces that increase in height from inside the main pedal toward the outside. In Species III the protuberance is semispherical in shape. In Species IV the protuberance increase in height from one side of the pedal to the other and is composed of small bumps. In Species V the protuberance increases in height from one side to the other and is composed of small steps. In Species VI the protuberance constitutes a plurality of protrusions and the surface between the protrusions is recessed to form grooves. In Species VII contains slits provided by punching the selector pedal body.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claim 1 is generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which depend from or otherwise require all the limitations of an allowable generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Art Unit: 3682

Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C.103(a) of the other invention.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to William Windley III whose telephone number is 571-272-6460. The examiner can normally be reached on 8:30 AM to 5:30 PM Monday through Friday.
